

Installation instructions for the software aXbo up2date Version 1.2.x

- If you already have an older up2date software on your computer, you need to uninstall it in advance as follows:
Start/ (Settings)/ Control Panel/ Add or Remove Programs (Win XP) or Programs & Functions (Win Vista, Win7+)/ Remove
- Furthermore, you need to uninstall the existing National Instruments-Software (VISA-runtime), if applicable.

Uninstalling process

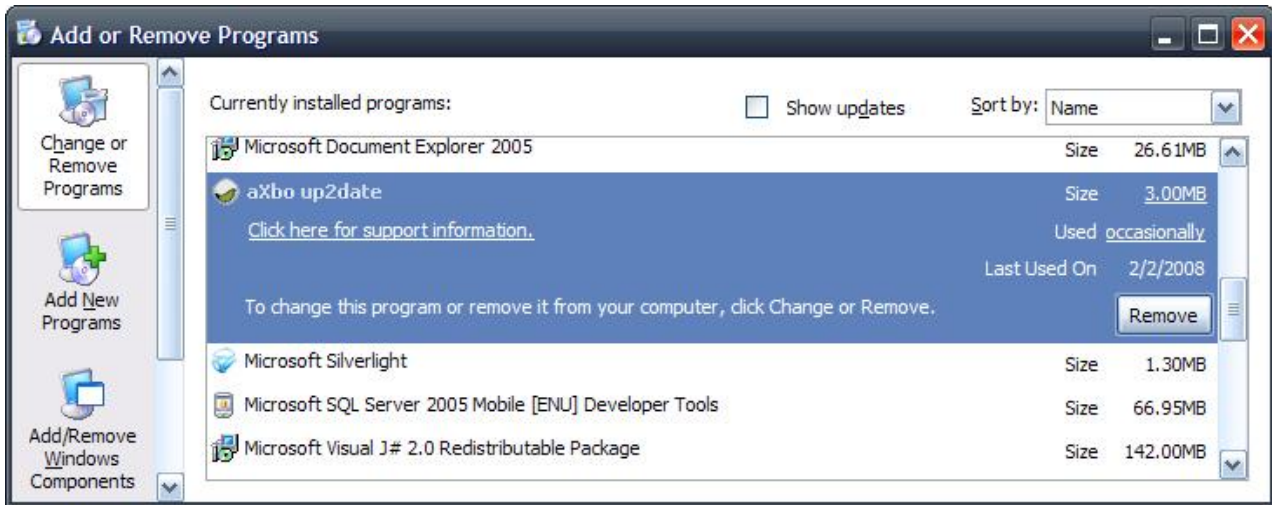

Start/ (Settings)/ Control Panel

Add or Remove Programs

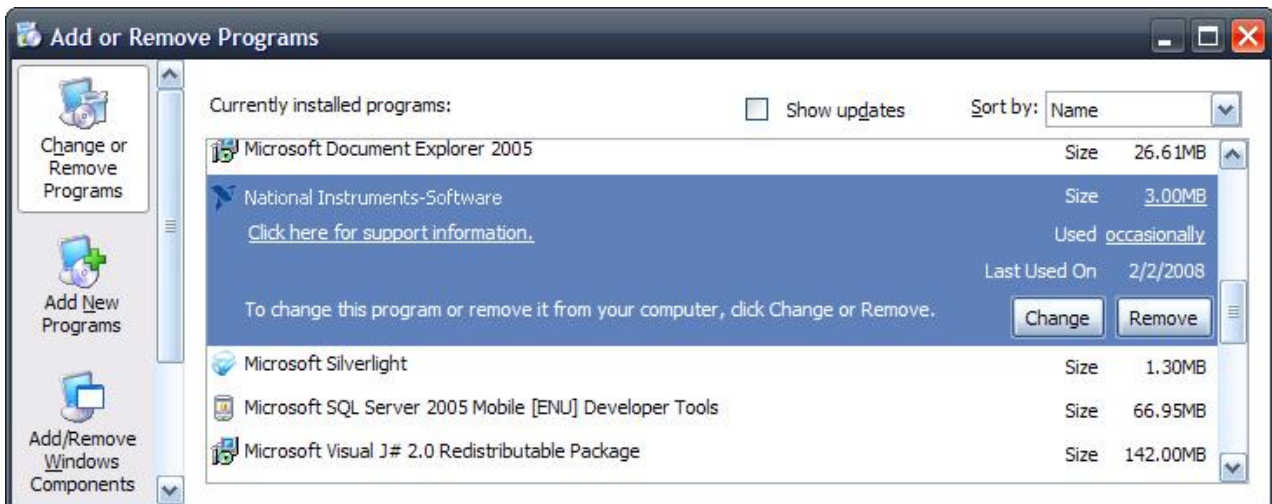

Mark aXbo up2date / support information

If older than the version you want to install: Click on button „Remove“ (example Win Vista)

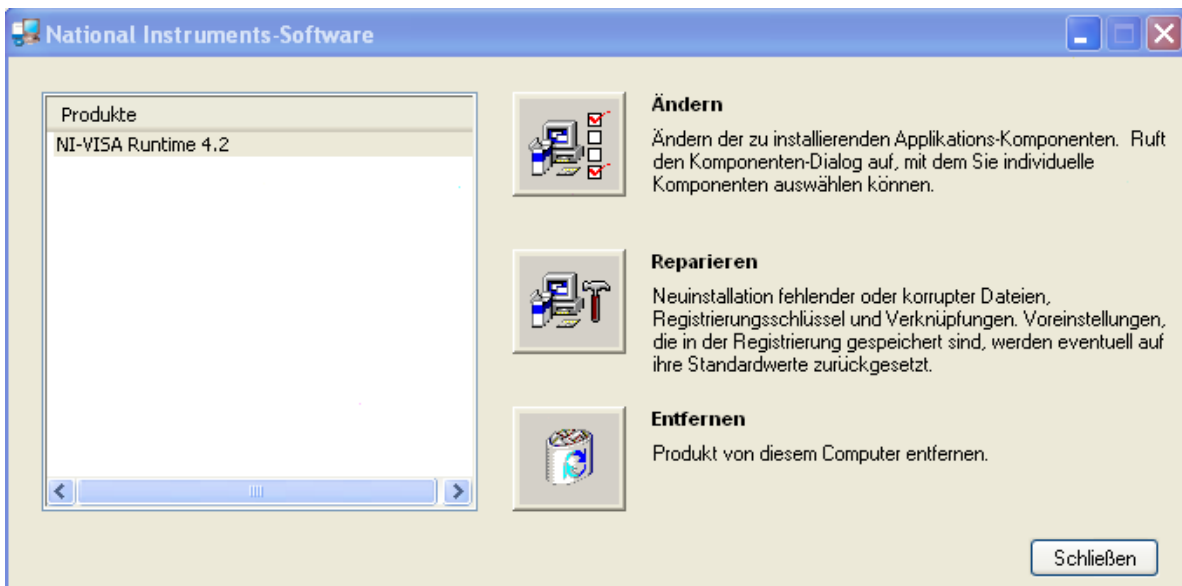

Mark National Instruments-Software, if existing.

Click on button „Remove“ (example Win Vista)

Products: Mark NI-VISA runtime 4.2

Click on button „Remove (Entfernen)“
